

## **Interface-NRM Health and Safety Policy**

It is the intent of Interface-NRM to provide a safe working environment for all our team members and stakeholders.

Our entire team is committed to improving health and safety within our office environment and for those team members delivering our services in the field.

The health and safety of our team members and those who visit our place of work is our priority and we will strive to ensure the health and safety of each. We will comply with the requirements of health and safety legislation.

Senior management will demonstrate appropriate behaviours and leadership in promoting a positive health and safety culture within our organisation. Team members will play their part in ensuring their safety and the safety of others.

Where necessary, training will be provided to ensure the competency concerning health and safety issues.

We will report and investigate accidents, incidents and near misses to drive improvement in our health and safety management. We will define our health and safety objectives and targets, and we will openly review and report on our health and safety performance.

This policy has immediate effect and will be reviewed and amended as necessary.
